

Persons of Trust in the Faculties and Graduate Schools

In order to offer low-level counselling in case of conflicts, the University has proposed the appointment of persons of trust at faculty level. They are available to all faculty members as a contact point for problems and conflicts of any kind; they offer **confidential counselling**, seek solutions together with the persons concerned and, if necessary, refer to competent bodies and committees, e. g. the [Ombuds Office](#), the [ombudspersons of the University](#) or the [confidential advisor and ombudsperson for students](#).

* These faculties do have not explicitly appointed a person of trust, as one person from the faculty currently acts as the university's appointed ombudsperson and as such is responsible for issues and conflicts relating to good research practice across all faculties. However, the university ombudspersons can also be contacted at faculty level and, if necessary, clarify with those concerned where their concerns can best be dealt with.
